Class X, Matriculation - 82 Percentage *Jagatsinghpur, Odisha*

Technical Skills

Languages: Java, C++
Web Technologies: JavaScript, HTML, CSS, Bootstrap
Database/Query Languages: MySQL,mongoDB
Framework: React js,Node js,Express js
Containerization: Git
Interest Areas: Full stack web development, Programming
Miscellaneous: Data Structure and Algorithms, Operating Systems, Database Management System

Experience

Teachnook Jan 2023 – Feb 2023
Web Developer *Bhubaneswar, Odisha*

- Demonstrated advanced proficiency in HTML, CSS, JavaScript, SQL.
- Acquired practical experience in the industry work culture, while actively applying critical thinking and problem-solving skills to both team and individual projects.
- Applied refined communication, organizational, and interpersonal skills to collaborate effectively with colleagues.
- Developed a comprehensive Analytical skill.

Projects

Electricity Management System | *Java* May 2023

- Designed and implemented a robust Electricity Management System using Java, demonstrating proficiency in software development and system architecture.
- Utilized Java for backend development, ensuring a scalable and maintainable codebase.
- Integrated database management using [My sql], ensuring seamless data storage and retrieval.

HR Management System | *Servlet, JSP* March 2023

- Led the development of a comprehensive HR Management System leveraging Servlets and JSP technologies.
- This project demonstrated my proficiency in Java-based web development, software architecture, and effective collaboration with stakeholders.
- Developed dynamic and interactive user interfaces using JSP for seamless user experience.

Transport Management System | *Spring-boot, react* April 2023

- We developed a Transport Management System, leveraging the power of Spring Boot for the backend and React for the frontend.
- This comprehensive system is designed to streamline and optimize the logistics and transportation processes. The Spring Boot framework provides a robust and scalable backend infrastructure, ensuring efficient data handling, security, and seamless integration with databases.

Video Chat | *Node js* Jun 2023

- The goal of this project is to develop a video chat application using Node.js and Socket.io.
- The application will allow users to initiate video calls with each other in real-time, enabling seamless communication over the internet.

Leadership / Extracurricular

* Demonstrated effective leadership skills through the successful management of project/team, resulting in [specific achievement]
* Led a cross-functional team to achieve through strategic planning and collaboration.
* Engaged in community service initiatives, demonstrating a commitment to social responsibility and making a positive impact.

Achievements

* Certification for Completing Java by KIMO.
* Certification for Completing HTML by KIMO.
* Achieved ★ ★ ★ ★ in C++ on Hackerrank.
* Certification for Completing Node js by Udemy.
